SPAIN DIGITAL WEEK
by adigital

POSITIONING & PROCESSES

4 key data points

1. First EU country to open a live AI Act regulatory sandbox

12 AI systems tested

16 compliance guides published by AESIA

2. Driving digital cooperation with Latin America and the Caribbean

Spain organized, with AECID, the first high-level political dialogue of the EU-LAC Digital Alliance, drawing on its regional ties. Spain is also active within the **D4D Hub** (Digital for Development Hub) and its **Private Sector Advisory Group**, the main platform coordinating EU-LAC digital cooperation.

3. Legislative files closed during Spain's EU Council Presidency (2023)

Political agreement on the:

- AI Act
- Data Act
- Cyber Resilience Act
- eIDAS2
- European Health Data Space

4. Spanish MEPs as active rapporteurs and shadow rapporteurs since 2019

on major digital dossiers:

- Cloud and AI Development Act
- Data Act
- Chips Act Joint Undertaking
- Parliament's own-initiative report on technological sovereignty
- +

POSITIONING & PROCESSES

Central idea

The European Competitiveness Laboratory

Proposed by Spain

Now backed by 7 countries

A continuous platform to pilot cross-border initiatives between public administrations and industry, testing new economic instruments to boost the EU's competitiveness.

What should happen next in the digital domain:
EU Member States and stakeholders should back this proposal to ensure digital policy goals are actually delivered — aligning funding decisions with strategic goals and measurable results. Ambition must be brought to life.
